A Time for Change

In recent years, Australian education has experienced new challenges that threaten student retention and completion. Recent surveys reveal:

- 1 Lack of proactive academic support has contributed to early student departure.
- 2 Students are unclear on degree requirements and job prospects.
- 3 Post-COVID 19 pandemic, institutions are operating under significant resource constraints, hindering their ability to focus on student engagement.

The [QILT 2022 Student Experience Survey \(SES\)](#) shows that student support is the **only** focus area to have seen ratings fall for the past two years (2021-2022). There's never been a clearer signal for change—to equip institutions with the tools and technology to drive student success.

And that change begins with a reimagining of the technology to support *your* entire campus.

18.8% of undergraduate students and 17.7% of post-graduate students in Australia indicated they considered leaving their institution in 2022.

The Path Forward

Good news—you're not alone in this challenging landscape. In fact, we've seen these challenges persist across the globe, and have worked alongside our 2,900 customers to innovate in response.

Degree Works really facilitates conversations that are able to keep students on task course by course, semester by semester, all the way until they cross that stage and earn their credential.

Improve Student Retention, Completion, and Satisfaction with Ellucian Degree Works

Every student's educational journey is unique. It takes a team effort to guide a student from start to finish—from planning to advising to requirements understanding. Degree Works empowers students and their advisors to make the finish line a reality.

Here's how:

Constructive planning

Advisors and students create, maintain, and amend course plans over time. A shared command centre empowers interactive "What if?" scenario planning to help ensure on-time completion.

Personalized advising

Advisors and students share a comprehensive view of course progress and requirements. Advisors receive proactive alerts to engage at-risk students earlier and steer them back onto the correct path.

Transparent credit transfer

Advisors and students understand how credit from their former institution is mapped to yours. This mapping clarifies the outstanding requirements for completion.

With Degree Works, advisors and students remain focused on the subjects that matter for completion.

Ellucian Degree Works vs. Other Degree Planning Solutions

SaaS enabled: Minimise operational overheads and risks for new functionality and security updates.

Mobile friendly: Increase availability and allow user access anytime, anywhere.

Out-of-the-box integrations: Enable robust integrations with ERP/SIS via open APIs and extensibility tools.

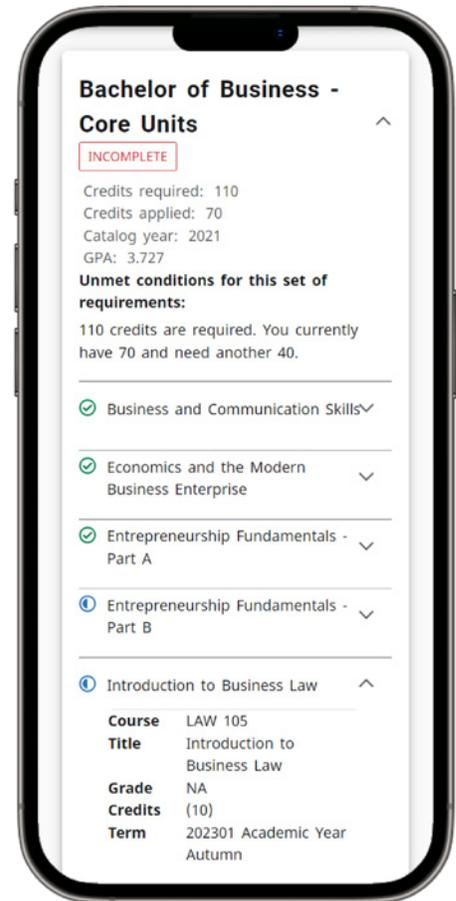

FTE pricing: Leverage Degree Works based on full-time equivalent students, not the number of application users.

Make every day a winner via a personalised Ellucian Experience

We are more productive when technology understands and supports our unique needs. Having a clear picture of each day—and the tasks that make it successful—help ground us in what’s important and of the highest priority. Built on this exact premise, Experience offers a tailored interface that powers day-to-day activities in one unified place for your students and staff. The result? Better student experiences.

Student ownership

- Access critical information via personalised cards, ranging from class schedules to financial aid requirements.
- Initiate common workflows, like paying a bill or reserving a conference room.
- Receive task reminders to stay on track with busy, complex schedules.

Staff support

- Re-allocate up to 75% login time saved via single-sign on toward student-related initiatives.
- Help students faster via one-click workflows, like managing their student account or reviewing degree requirements.
- Get proactive push notifications and alerts to engage at-risk students.

Ellucian Experience, An Unlocker of Innovation

Single source of truth: Make data from multiple systems understood and actionable in a single location.

Real-time updates: Receive up-to-date information via cards that refresh in real time.

Monthly releases: Access new functionality and integrations each month across student and staff personas.

Your Holistic Solution

Do you remember the challenges across Australian education from earlier? Degree Works and Experience are powerful responses on their own. But together, they address the challenges facing Australian institutions today.

When used together, data from Degree Works feeds directly into Experience cards to facilitate a connected experience for all your campus users:

- **Degree progress card:** Student can view course progress data with quick access to degree audit functionality.
- **Academic plan card:** Staff and students can access student academic information to show if students are on track or off track for degree completion.

And since Experience offers a Software Development Kit (SDK), your staff can create additional cards around completion and transfer requirements to supplement the included Ellucian-developed cards.

As higher education addresses new challenges, student demands are evolving in response. Technology is not the single answer; rather, it's the means to unlock time and innovation to support students in achieving their full potential.

Degree Works and Experience are singularly focused on empowering student success, backed by an organization that's 100% dedicated to tertiary ed institutions of all types of sizes across the Asia-Pacific region.
