

# Actionable Audits. Student & Advisor-Driven Plans.

Transform course, program, and academic data into detailed audits and manually administered plans that power on-time completion.

It's no secret that academic audits should be detailed, up-to-date, accurate, and actionable. But we also know this is easier said than done. Between everchanging catalog years, program requirements, and schedules, no document or brain can effectively manage this information. Enter Degree Works.

“Degree Works has allowed us to make sure that we’re giving [students] clear direction.”

**Adam Breerwood**  
President, Pearl River Community College

**31% increase**  
in degrees awarded to  
first-generation students

Alan Hancock College

**Streamline the path to completion—keeping the focus on meeting degree requirements, not deciphering them.**

### **Make audits actionable.**

Convert audits into plans that can be actively managed for most scenarios—like changing majors or withdrawing from a class. What-if scenario planning helps students understand how potential changes may affect their timeline.

### **Offer personal support.**

Stay updated when students fall behind completion requirements so you can intervene proactively with tailored advice. And, if you use Ellucian CRM Advise, advisors receive automatic alerts to reach out.

### **Scale with templated plans.**

Create academic pathways for students whose programs have more structure and rigor. Think of nursing majors who often must take the same classes and labs in a specific sequence.

**Let students be owners.**

Show students their academic progress via their personalized Ellucian Experience workspace. Degree Progress and Academic Plan cards put them in the driver's seat for their education.

**Simplify the transfer process.**

Map credits across institutions, helping students understanding how their previously earned credits apply to your requirements. It's time students have the data to inform their transfer decision—before they transfer.

**Are you ready to get more students across the finish line? Every successful plan requires an audit that tells the full story. Contact an Ellucian team member today.**

Charting the digital future of higher education with cloud-ready technology solutions and services, Ellucian serves more than 2,900 customers and 22 million students in over 50 countries.
