

Virtual Advisor

AI-powered advising designed to drive students through the financial aid and enrollment process

Ellucian Virtual Advisor is an AI-powered assistant that incorporates SIS data to create student-specific conversations to drive degree completion. Automate the financial aid process and allow advisors to spend more time consulting students on their financial path to a degree. With over 850 curated questions and equipped to handle over 100 languages, Virtual Advisor comes out of the box to personalize conversations for your diverse student needs.

of students expect to have access to a 24/7 virtual resource to answer their questions.

As a system-agnostic chatbot, Virtual Advisor allows your institution to have data-driven conversations through integration with any SIS. Tying analytics to every step of the student journey allows you to gain more visibility into advising efforts and further provide students the personalized support they deserve.

Experience the Benefits of Machine Learning

Virtual Advisor continually improves the quality of answers and comes with a library of 850+ vetted questions.

Meet Students Where They Are

Embed Virtual Advisor on your website, social media, offer letters, and more.

Free Up Staff Time

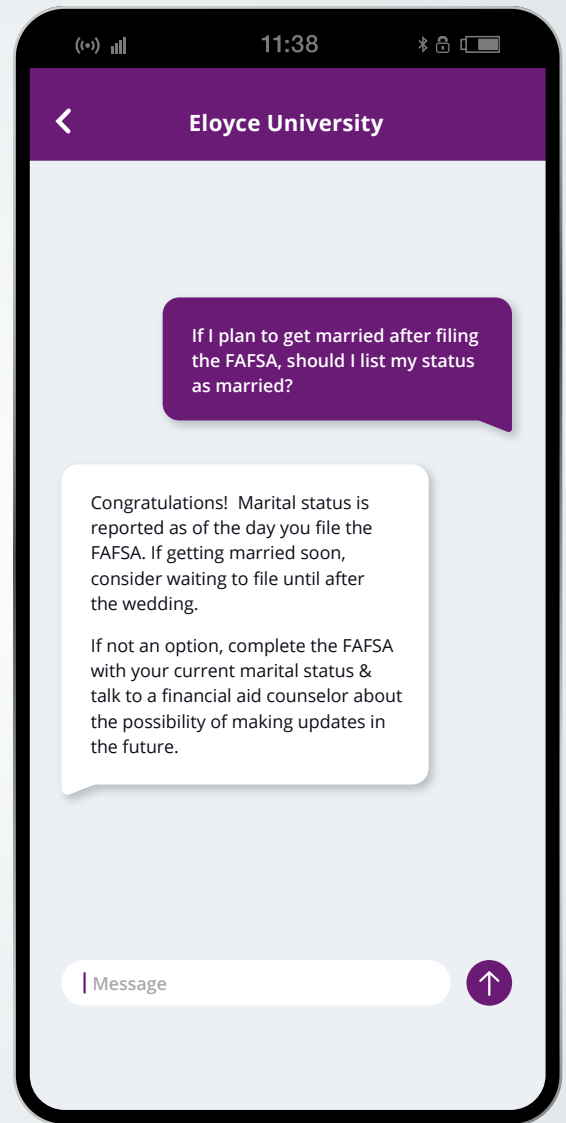

Deploy Virtual Advisor to answer repetitive questions, providing 24/7 support in over 100 languages.

Guide Students to Degree Completion

Craft outbound nudging campaigns to engage students while enabling support for prospective and current students.

Adapt to Student Needs

AI-driven sentiment analysis helps you understand student satisfaction while instantly tagging in team members when students need intervention.
